DYNO

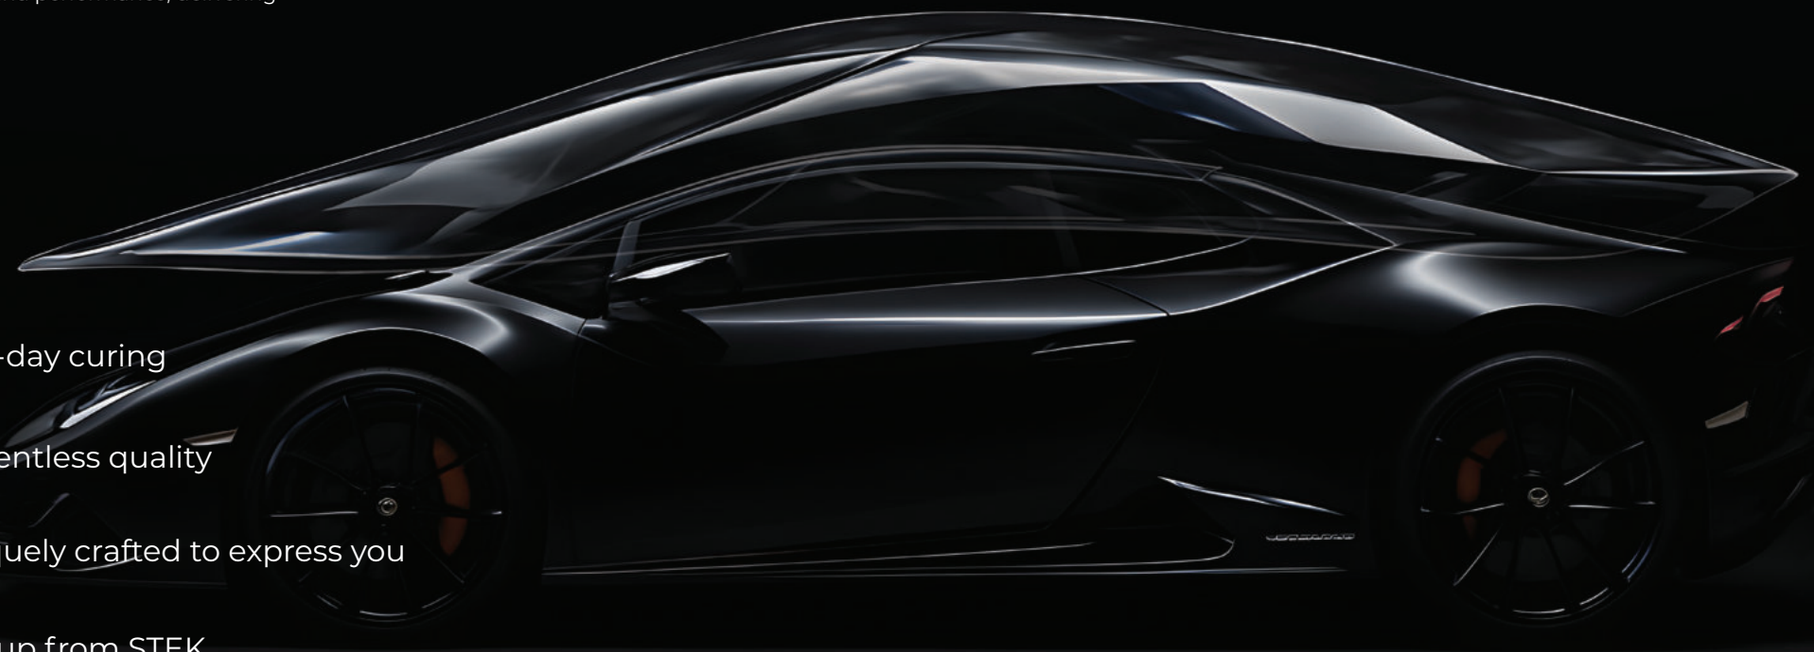

Authenticity towards perfection

DYNO over-the-top quality to fly under the radar

Engineered with STEK's most advanced technology and craftsmanship. DYNO provides your vehicle with a layer of protective excellence- shielding and enhancing every surface.

From crystal clear gloss to deep, vivid colors with long-lasting brilliance, DYNO delivers unmatched luster and durability. The epitome of elegance and performance, delivering perfected protection.

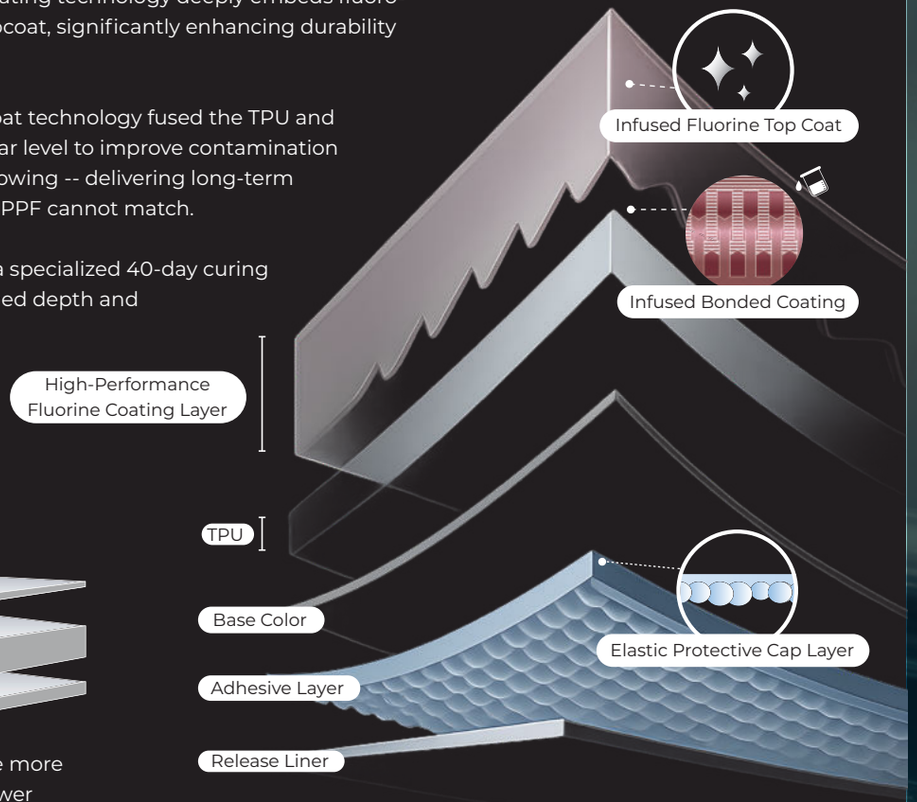

1. Deeper gloss achieved through 40-day curing
2. Precision-engineered to ensure relentless quality
3. Signature colors and patterns, uniquely crafted to express you
4. Solve car care with a complete lineup from STEK

DYNO's Innovative Technology - The Difference Your PPF Deserves

Our proprietary infusion coating technology deeply embeds fluoro-based particles into the topcoat, significantly enhancing durability and stain resistance.

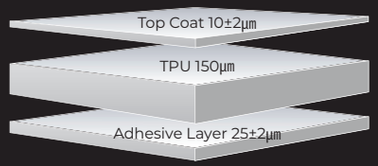

DYNO's bonded TPU top coat technology fused the TPU and topcoat layers at a molecular level to improve contamination resistance and prevent yellowing -- delivering long-term performance that ordinary PPF cannot match.

This unique structure and a specialized 40-day curing process create an unmatched depth and long-lasting quality finish.

DYNO Premium High-Density Layered Structure

Typical PPF

Ordinary PPF tends to have more orange-peel texture and lower resistance to fading and yellowing, worsening in appearance over time.

Why DYNO? A Relentless Commitment to Quality

STEK's premium PPF, DYNO, features a specially designed topcoat and adhesive layer that undergoes an exceptionally long 40-day curing process.

The longer curing time ensures even light reflection across the surface and creates a deeper, more transparent film, which adds a whole new level of brilliance to your vehicle's finish.

Extremely smooth finishes achieved through 40 days of curing

Colored PPF using automotive-grade paint to deliver high-end paint-like finishes

Proven performance and durability you can rely on

The ultimate choice for customers who demand the best

DYNO’s Innovative Technology Seamless PE Cap Sheet with No Tunneling

DYNO PPF uses a high-performance PE cap sheet that protects the surface during plotter cutting and keeps the film in perfect condition after installation.This advanced cap layer eliminates tunneling (air channels and creasing), ensuring a smooth, flawless finish while improving both ease and efficiency of application.

Clean, damage-free plotter cuts

Tight, secure adhesion with no tunneling

Consistent pressure and precision, even on curves

Smooth cap sheet release for faster, easier installation

Reliable quality, every time

DYNO
Clear Series

Pure clarity. Deep protection. Lasting brilliance.
DYNO PPF uses real automotive-grade pigments and advanced coating technology to bring out your car’s true color with richer depth and clarity.Its high-performance surface resists everyday scratches and keeps a flawless gloss that lasts.

DYNO MATTE | FLAT

Sleek Matte Protection with a Refined Edge
More than just a matte look, DYNO Matte enhances the original paint with a sophisticated, high-end finish.With 72” wide coverage, it wraps even large panels seamlessly. The rich texture and deep matte color offer owners a sense of pride and satisfaction.

True Matte Texture | Signature Matte Glow | Perfect Matte Match | 72” Wide Coverage

DYNO BLACK

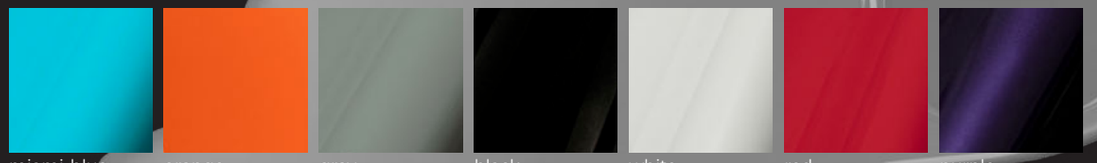

Deep. Bold. Unmistakably premium.
DYNO BLACK delivers the richest, glossiest black finish available—
deeper and clearer than paint alone can achieve.
Its advanced layering technology brings out unmatched depth
and a true black that elevates any vehicle's presence.

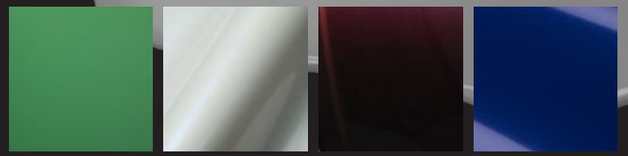

Real Paint Finish | **Deep Black Color** | **Extreme Gloss**

DYNO
Color Series

Using premium paint and DYNO technology, we deliver vibrant true colors, strong durability, and self-healing properties. The color is achieved by blending automotive-grade pigments directly into the adhesive layer, then integrating it with TPU — ensuring a lasting finish that maintains its depth and clarity.

Standard Colors

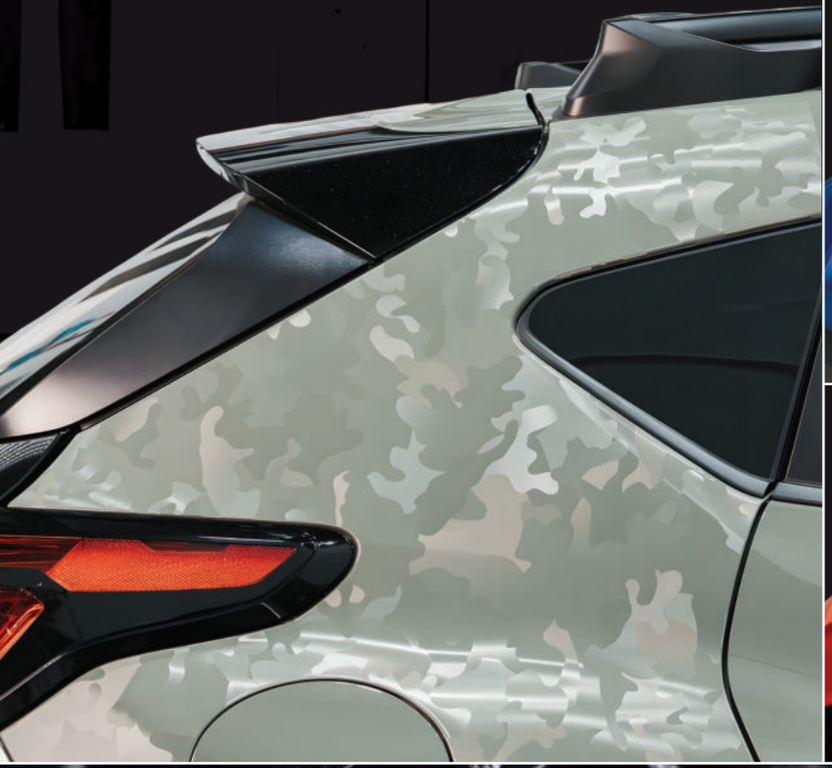

Matte Colors

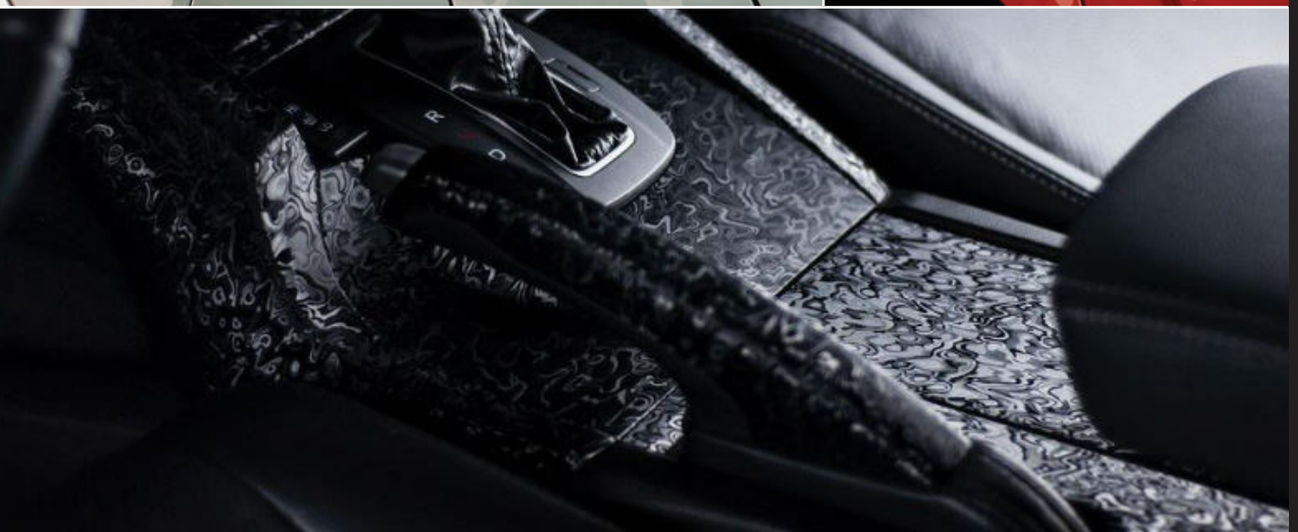

And many more DYNO Color Series options are available beyond these colors.

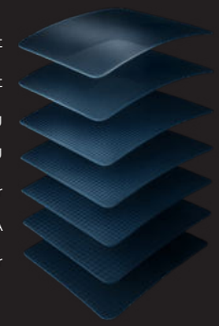

DYNO
Pattern Series

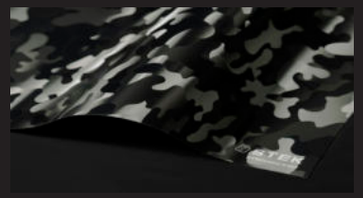

PPF that creates trends with unique patterns never seen before.
Featuring distinctive designs like Carbon, Damascus, and Camo, it delivers outstanding protection and performance. Achieve exclusive style and quality without custom parts.
Now improved with enhanced adhesion and durability, the 2-ply structure highlights the real carbon pattern with greater depth and dimension.
